

Srikanth Doddi

Solutions Architect | AI/ML & Fullstack | Cloud | Leadership

9490450035 srikanth.cloudarch@gmail.com linkedin.com/in/srikanthdoddi Hyderabad, INDIA

PROFESSIONAL SUMMARY

Innovative Architect and proven engineering leader driving **fullstack**, **AI** and **distributed cloud solutions**. **Certified Cloud expert** in building scalable, enterprise-grade systems with strong delivery through **CI/CD**, **containerization**, and **orchestration**. Experienced in **presales**, including **solution design** and client engagement to drive business growth. Combines deep technical insight with strategic leadership to deliver business impact and operational excellence.

Key Competencies:

- **Leading** a department focused on **Presales, R&D**, leading innovation and strategic direction handling a Team of 23 Engineers.
- Designed **distributed OCR Solution** with Lambda, SQS, SNS using **event-driven architecture** and **saga patterns** for **fault-tolerant** multi-region processing leveraging cloud and custom solutions.
- Experienced in presales activities including **technical solution design**, **client requirement analysis**, **proposal** development, and conducting **product demonstrations** to support business growth and customer acquisition.
- Expert in designing and deploying **AI/ML pipelines**, LLM-based solutions, NLP applications, **Agentic AI** systems and multi-modal solution.
- Developed **distributed cloud storage** systems using **Golang** at **Hivenet**, building **peer-to-peer** (P2P) architecture with IPFS (InterPlanetary File System) protocol for **decentralized** file storage, implementing content-addressed storage using distributed hash tables (**DHT**) and ensuring data persistence across network nodes
- Extensive **full-stack** development experience with React, Angular, Node.js, Python, TypeScript, and Go, strong in RESTful APIs.
- Proficient in AWS, Azure, and GCP **cloud platforms** and services including SageMaker, Lambda, EC2, S3, RDS, DynamoDB.
- Skilled in **CI/CD pipelines**, Docker, automated deployments, software release management, Git, and testing automation.
- Leading hiring and **training** engineers, successfully managing 8 engineer batches over 4 years, along with continued **Mentorship**.
- Actively volunteer and co-organize open source events like **FOSS (Free Open Source Software)** and was a guest speaker at **PyCon India 2025** presenting on Retrieval-Augmented Generation (RAG) solutions.

EXPERIENCE

Architect

12/2021 - Present

OSI Digital Private Limited

As an Architect focusing on AIML & Fullstack I have worked on and achieved:

- Awarded '**Manager of the Year**' (2024) and '**Performer of the Year**' (2022) for exceptional technical leadership and innovation.
- Spearheading the AI/ML Center of Excellence, guiding cross-functional engineering teams in architecting **AI/ML pipelines**, **microservice-based backend**, and distributed cloud infrastructures powering **IoT** telemetry and **GenAI** use cases.
- **Full-Stack Development:** Extensive experience in **frontend and backend development**, designing scalable web applications with **React, Next.js, Node.js, Python, and JavaScript/TypeScript, Golang**. Strong knowledge of **RESTful APIs, GraphQL, and microservices architecture**.
- Developed a RAG chatbot for document querying using vector embedding and semantic search. Designed pipelines for source-cited answers, hallucination mitigation, and added document domain extensibility. Enhanced prompt optimization, relevance ranking, and caching for accuracy and speed.
- Designed agentic AI solutions leveraging **multistep task decomposition**, tool-calling LLMs, and **event-driven orchestration** to automate business processes spanning **knowledge retrieval**, workflow execution, and data transformation. Integrated autonomous AI behaviors with **guardrails, governance policies**, and **audit logging** to ensure **enterprise security, compliance, and transparency**.
- Architected an end-to-end demand forecasting pipeline using classical ML models (ARIMA, Prophet, Random Forest Regressors) and cloud-based feature pipelines to process seasonal, regional, and historical datasets. Delivered interpretable predictions and confidence intervals to support inventory planning, resource allocation, and operational decision-making while reducing forecast deviation and cost of over-stocking.
- Developed an **OCR** processing architecture enabling real-time extraction of structured data from invoices and scanned documents using cloud-based **ML** services, image preprocessing, and layout analysis. Integrated downstream **validation, enrichment**, and exception-handling workflows to reduce manual entry errors and accelerate processing throughput across operations.
- **Cloud Computing & DevOps:** Proficient in **AWS, Azure, and GCP**, including services like **SageMaker, Lambda, EC2, S3, RDS, DynamoDB, and Kubernetes**. Skilled in **CI/CD pipelines, Docker, Terraform, and automated deployment workflows**.
- Created a **computer vision pipeline** to estimate accurate **Interpupillary Distance (IPD)** using **facial landmark detection**, geometric calibration, and depth inference techniques. Optimized model accuracy through pre- and post-processing filters to support optical prescription assessments, **AR/VR** fitting scenarios, and user-facing measurement applications.
- Created an avatar platform for real-time AI with text-to-speech, speech-to-text, and animation sync. Developed low-latency streaming pipelines for avatar expression mapping, LLM response synthesis, and session management.
- Implemented **Model Context Protocol (MCP)** server-based solutions to unify access to enterprise systems, tools, and data sources through pluggable adapters for LLM runtimes. **Designed context-aware** tool invocation layers, scoped permissions, and domain abstraction interfaces enabling **secure, deterministic** execution of AI-driven workflows within enterprise boundaries.
- Established **GitLab CI/CD** pipelines organization-wide, increasing code reuse by 40%.
- Developed a storage solution leveraging **IPFS blockchain**, creating both **desktop** native and Electron apps.

EXPERIENCE

Senior Software Engineer

12/2020 - 12/2021

Presidio Cloud Solutions

A cloud services and solutions provider

- Mentored junior engineers on system reliability engineering best practices
- Designed and developed solution architectures for 5 custom applications, improving system performance by **30%**
- Developed and architected healthcare applications serving **500+** providers
- Created an ingestion profile using **AWS Serverless Computing**, reducing costs by 20%
- Developed custom integrations between **AWS services**, reducing latency by 10%
- Implemented monitoring solutions using **AWS CloudWatch** for **20+ Kubernetes pods**, reducing downtime by **5%**
- Advised on application development and **cloud infrastructure** for projects, improving scalability by **30%**
- Implemented **decentralized** storage solutions using blockchain technology
- Conducted research on **multi-dimensional event logs**, reducing event latency by 15%

Software Developer

01/2019 - 12/2020

Accenture

A leading global professional services company

- Received '**Accenture ACE Award**' and '**FY20H1 Spot Award**' for 'Future Ready Skills' in 2020
- Containerized large NodeJS applications using Docker and deployed them on ECS
- Implemented standard cloud and Git practices in the team, improving workflow efficiency by 20%
- Refactored a suite of 5 applications, improving code quality by 15%
- Conducted training on Docker, improving team proficiency by 25%
- Developed automation test suites for 3 Angular-based web applications, reducing testing time by 40%

Software Developer

05/2018 - 01/2019

innData Analytics

An analytics-focused software company

- Containerized and deployed 3 large-scale applications on **AWS ECS**, reducing infrastructure costs by 20%
- Worked as a **full-stack** MEAN developer on a high-load business application handling 50,000 transactions per day
- Collaborated with clients to build a successful product, achieving a 90% client satisfaction rate
- Utilized **GCP** for Cloud Functions, achieving a 15% improvement in function execution time

Product Development - Intern

09/2017 - 11/2017

NowFloats

A company focusing on digital marketing solutions

- Built an **NLP Processor** with an **API Gateway** using **Google's DialogFlow**
- Contributed to building a custom chatbot framework
- Responsible for Documentation of the Product **ANA**

EDUCATION

M.Tech, Data Science & Engineering

Hyderabad, India

Birla Institute of Technology & Science, Pilani

B.Tech, Computer Science

Tadepalligudem, India

Jawaharlal Nehru Technological University

SKILLS

Languages: Python, JavaScript, Swift, Shell Scripting

AIML & Generative AI:

Dialogflow, Watson, RAG, HuggingFace, OpenAI, LangChain, Prompt Engineering, Agentic AI, MCP, VectorDB, Croma, Qdrant, CrewAI, MLFlow, KubeFlow, FastMCP LangGraph, LangFuse

AWS:

Bedrock, Rekognition, Bedrock Data Automation, Transcribe, Textract, Kendra, Lambda, ECR, ECS, API Gateway, EventBridge, S3, Sagemaker

Cloud & Containerisation: AWS, Azure, GCP, Alibaba, Docker, Kubernetes

Architecture & Distributed Systems:

microservices, temporal, event-driven architecture, service orchestration, API design, cloud native, CI/CD automation, fault-tolerant systems

Databases: MongoDB, DynamoDB, MySQL, Postgres, Chroma, Qdrant, FAISS

SKILLS

CICD: GitHub Actions, AWS Pipeline, Jenkins

Version Control: Git, GitHub, GitLab, AWSCodeCommit

Backend: NodeJS, Flask, FastAPI

Frontend: React, Angular

Cross Platform Applications: Ionic, Electron

CERTIFICATION

AWS Certified Solution Architect Associate AWS Certified Solution Architect Associate	Microsoft Certified: Azure AI Engineer Associate Microsoft
Microsoft Certified Azure AI Fundamentals Microsoft	AWS Certified AI Practitioner AWS
Microsoft Certified Azure Data Fundamentals Microsoft	Microsoft Certified Azure Fundamentals Microsoft
AWS Certified Cloud Practitioner AWS	AWS Cloud Architect NanoDegree Udacity
Cloud DevOps Engineer NanoDegree Udacity	

VOLUNTEERING

Co-organiser FOSS (Free Open Source Software) Describe the organization or the project you worked on.	Date period
